MOUNTAIN SAFETY

LIGHTNING & THUNDERSTORMS – Inclement weather such as afternoon thunderstorms are common in the mountains. Seek shelter when you see a storm developing. Keep off ridgetops and stay clear of lift houses, lift towers, power lines, open clearings, the tallest tree in the vicinity, fences, and signposts.

FIRE DANGER – Due to existing fire dangers, smoking is strictly prohibited on the mountain including on chairlifts, in buildings, and on decks.

CONSTRUCTION WARNING – Base area and mountain improvements and repairs are made during the summer months. Vehicles and equipment may be encountered at any time. Terrain may be temporarily closed for construction.

ADEQUATE CLOTHING – Be aware, the weather changes quickly here. There is usually at least a 10 degree temperature difference from the bottom to the top of the lifts. Rugged footwear for hiking is advised.

ENVIRONMENT – Please leave wildflowers for others to enjoy. The growing season is quite short at high altitude. Stay on designated hiking and biking trails and give the fragile ecosystem an opportunity to thrive.

WILDLIFE – Be alert for wildlife and avoid wildlife encounters. Moose and bears as well as fox, chipmunks and ground squirrels and other wildlife may be seen. Do not approach or feed. Keep the wildlife wild and keep your distance to help avoid injury. Moose are unpredictable and may charge especially if dogs are present. All dogs must be on leash or under voice command at Winter Park Resort or in the Village.

WATER – Drinking water is available at The Lodge at Sunspot and the base of Winter Park. Don't drink from streams. Carry water with you while biking or hiking.

ALCOHOL/DRUGS – Anyone under the influence of alcohol or drugs is prohibited from riding lifts or participating in activities.

DRONES – The use of any personal drones is strictly prohibited.

ALTITUDE HINTS – There is about 50% more ultraviolet radiation at 10,000 ft. than at sea level. Always wear eye and skin protection. Also, at 10,000 ft. the oxygen is about two-thirds the density it is at sea level. This makes it harder for the body to absorb oxygen at higher elevations. People with respiratory or circulatory illness should consult a physician before coming to this altitude. Drink plenty of water when hiking or biking. Our high, dry air accelerates dehydration. The Lodge at Sunspot is at 10,700 ft. and trails go up from there. Take it easy! Pick up a flyer for information on altitude sickness at Guest Services.
