Unexpected weather and wind gusts in excess of 50 miles per hour can occur suddenly and without warning. All tents are to be adequately roped, braced and anchored to withstand the elements of weather and prevent against collapsing at all times both during the day and overnight. Tents must be able to withstand winds in excess of 50 miles per hour. All tent corners should be secured. If a tent is permitted to be left standing overnight, it is suggested to lower the tent to the lowest position possible. Umbrellas are to be secured and anchored to the same standards as tents. Stakes are not to be used at Winter Park Resort or in the Village at Winter Park unless locates have been done and permission granted. Be prepared to bring weights, tie-downs and/or other accessories as these items are not supplied by the Resort or the Village. You are responsible for any injury or damage due to “flying” tents or umbrellas or stakes put into underground utilities. Securing/Anchoring suggestions include:

- Portable fire extinguisher(s) must be available, and placed no more than 30 feet away from the cooking/flammables location(s). Portable fire extinguishers are not supplied by the Resort or the Village.

Generators and other internal combustion power sources shall be at least 20 feet from any tent, and shall be isolated from contact with public by means of fencing, enclosure or other approved means.

REFUELING AND FUEL STORAGE

No filling or refilling of propane or butane cylinders during events. No refilling of non-refillable cylinders permitted at any time.

No refueling of flammable liquid fuel equipment, unless approved by the Resort or Village event manager, and shall only be performed at approved locations, at least 20 feet away from any tent.
